Physical description of property and statement of historical significance:

This is a one story commercial building with a flat roof and a rectangular floor plan. It consists of two identical bays built at different times with matching brick work. The two storefronts at street level have been changed. The bay on the north contains a recessed aluminum frame glass door and a three-light, fill height window. The southern bay is clad with large glazed tiles and has its entry recessed at the south end. Both stores have separate metal awnings. The parapet has decorative squares formed by paired bricks and a projected course at the top and sides.

The building currently standing was constructed at two different times as the north half is of reinforced concrete while the south half is of concrete block construction. A restaurant was located on the south.
